DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Hus et al. (3,347,977).

Hus et al. discloses an electrical conducting cable (12) consisting essentially of: (a) a conductive core having solid one-piece terminal lugs (22, only one shown) at each end; (b) a single gas impermeable sheath (14) having an inner surface and an outer surface, the outer surface of which is hermetically sealed to each of the terminal lugs.

3. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Schaefer (3,389,368).

Schaefer discloses an electrical conducting cable consisting essentially of:
(a) a conductive core (47) having solid one-piece terminal lugs (42, only one

shown) at each end; (b) a single gas impermeable sheath (46) having an inner surface and an outer surface, the outer surface of which is hermetically sealed to each of the terminal lugs.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaefer.

Schaefer discloses the invention substantially as claimed. Schaefer does not specifically disclose the conductive core comprising copper. However, it would have been obvious to one skilled in the art to use copper for the conductive core of Schaefer since copper is well-known in the electrical cable art for being used as conductive core because of its highly conductivity.

Allowable Subject Matter

7. Claims 1-5 are allowed.

8. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
